## Some advice I've got...

- Know your audience
- Say it with pictures
- Tell a story
- Explain EVERYTHING on your slide
- Practice

# Practical matters

- Leave 2-3 minutes for each slide
- 10-minute talk: about 2 minutes each for your introduction, techniques/methods, results and discussion
- 30-minute talk: expand parts as needed for your audience, typically techniques/methods and results part.
- Give credit where it's due
