

## Math 40 - Quiz 1

Be sure to use PROPER mathematical notation and show some steps. Use back of page if needed.

1. Perform the operation and simplify completely.

a.  $\frac{25}{24} \div \frac{15}{36}$

b.  $\frac{5}{12} + \frac{3}{8}$

2. Round the given number to the nearest tenth

123,456.789

3. Perform the operation **by hand**. Carry out the division until there is no remainder.

a. Multiply:  $1.34(5.3)$

b.  $12 \overline{) 345}$
