

CS 444 - Individual Assignment - Sumo 2

Sumo References Take 2

Deadline

Submit the file `sumo-refs-take2.txt` by the BEGINNING of class on TUESDAY, MAY 5, with a homework number of 6.

Purpose

To provide a chance for others to see your responses to the Sumo 1 individual assignment, to give every class member a little additional push to individually consider additional SumoBot possibilities going into the last week of the SumoBot project, and to perhaps even build a class-list of annotated SumoBot-ideas resources.

Important Notes

Parts of these MAY be posted.

What to do

- Create a file `sumo-refs-take2.txt`, starting with:
 - your name!
 - the last-modified date
- Your gathered responses for CS 444 - Individual Assignment - Starting the SumoBot Project (SumoBot 1) have been posted on the course Moodle site, in the "Miscellany" section.
- Read over these, and decide on **two** *responses* -- other than your own -- that you find useful and/or interesting. (A response is a set of three references.)

For EACH of these two responses, in `sumo-refs-take2.txt`, give the **response #** (that's between 1 and 23, then) and WHY you selected it.

- Then, check out some of these references. Select at least **three** *references* given -- DIFFERENT than those you listed -- that you think are useful and/or interesting.

For EACH of these three references, in `sumo-refs-take2.txt`, give the URL (for web references) OR the Title/Author/Publication (for ACM Digital Library references), and WHY you selected it.

- Submit your resulting file `sumo-refs-take2.txt`.
